

## Country Life Kids Camp

### EDventurer's Club After-School Voice Lessons

**Please Note:** All vocal lessons require the use of a headphone with an attached microphone (EarBuds or AirPods are an example). Ages 10 and up are encouraged to have noise reduction headphones with a microphone, but not required.

Age Level	Program	Description
Ages 6-9	Intro to Voice 	There is more to singing than meets the eye. When we sing it can benefit our bodies and brains! Use your voice to experiment with vibrations using sing- along songs. If you love to sing, this is the place for you! Did you know that music and movement are best friends? Discover how to include movement with your singing to make sure our voices are strong and healthy. Have fun experimenting with vocal exercises. Learn about singing using consonants and vowels. Creatively shape your singing using consonants and vowels. Discover why these two concepts are so important for singing. Practice these in warm-ups for clear, healthy, and fun vocalizing. In singing we can have words and music which is written by a composer. Become a composer and learn about song writing using "Vocal Mad Libs" to create your own words to your favorite songs.
Ages 6-9	Intro to Musicianship 	Our voice is our instrument! Learning to read music and repeating it back greatly improves muscle memory. Engage in a musical "Simon Says" and test your peers with creative melodies. "Do, a deer a female deer. Re, a drop of golden sun." Learn solfege, a system of unique symbols for each note of a scale. What is a scale? We'll learn about that too! "And a one, and a two, and a one, two, three...!" Music comes from the heart quite literally; our heartbeat is like the beat of music. Discover how to keep the beat and follow-along to simple rhythms that will introduce you to the values of notes. "Sing, sing a song," using our age-specific solfege, rhythm, and audiation knowledge we can learn and rehearse a song. The best part of singing is when we sing together. We will combine our voices and skills to learn a song.
Ages 6-9	Intro to Theatre 	Start your theatre experience with classic drama games to break-the-ice with your peers and get your acting chops in gear. Learn how improvisation is a useful tool to think on your feet in theatre and step up your acting game. In theatre, we can mix words and music which is called, musical theater. Become a composer and learn about song writing using "Musical Theater Mad Libs" to create your own words to your favorite songs. We can't have theater without characters. Use your imagination to create a character or imaginary friend. Give them looks and even a personality. Become a playwright. Work together with your peers to make a story, bringing your characters to life creating your own performance.
